

# THE FRANKFORT ROUNDABOUT.

GEO. A. LEWIS, Publisher.

A WEEKLY PAPER—DEVOTED TO LOCAL AND SOCIETY NEWS.

TERMS: \$1.00 In Advance

VOL. XXIX.

FRANKFORT, KENTUCKY, SATURDAY, MAY 12, 1906.

NO. 36

## Attractive Oxfords

Three styles only mentioned from among all the new styles here for women. These three selected because they are especially new and charming.

### Laird, Schober & Co. Ribbon Tie.

A dress low Shoe, made of patent calf, very light and flexible turn sole, plain toe and military heel, wide silk laces, large eyelets, price \$5.00.

### The New Pump.

In four leathers: Black gun metal calf and black ooze calf, \$4.00; patent colt skin and blue suede, at \$5.00. Pumps met with great favor last season on account of the attractive appearance they give the foot and the ease with which they are put on. Our Pump this season does not slip at the heel.

### \$3.50 Patent Colt Oxford.

One style with two large eyelets, the other with three, very wide laces, both with flexible turn soles and medium heels.

## R. K. McCLURE & SON

212-214 ST. CLAIR ST.

FRANKFORT, KY.

#### DESTRUCTIVE FIRE.

Big Warehouse of Kentucky River Mills Full of Hemp Burns.

At 3:55, on Tuesday morning, an alarm of fire from box 36, called the department to the big corrugated iron warehouse of the Kentucky River Mills, at Lock, No. 4, North Wilkinson street, where a fire had started by reason of spontaneous combustion. It was burning furiously.

The department continued to play two streams of water upon the big pile of hemp stored therein for pretty much the whole day in an endeavor to save some of the hemp, and were partially successful.

About \$20,000 was the valuation put upon the hemp, and it is said about a third of it was saved. What the loss, however, will be, will have to be ascertained after settlements are made with the insurance companies, which are carrying a line of 80 per cent. on the stock.

The company will not allow this accident to interfere with their business as their orders are far from filled, and harvest will soon be here when the twine product will be in demand.

#### IF YOU TRY

Father William's Indian Herb Tea, or Herb Tablets, and do not find them the best medicine you ever used for Constipation, Torpid Liver, Sick Kidneys, Sour Stomach, Sick Headache, Neuralgia, Dyspepsia, Indigestion, Malaria, Dizziness and Bad Breath, we will refund the money.

They work day and night and you get up in the morning feeling like a new person.

Try them; 20 cents, Tea or Tablets. For sale at Frankfort Drug Co.

#### EXCURSION TO CINCINNATI.

By reference to the advertisement in another column it will be seen that the F. & C. and Q. & C. Railroad Companies will run an excursion to Cincinnati to-morrow. Trains leave Union Depot at 7 a. m. Returning will leave Grand Central Depot at 8:30 p. m. Fare for round trip only \$1.25.

For every Headache cause there is a cure. Dr. Shoop's Twenty Minutes Headache Cure never fails—it put into circulation congested blood which presses and irritates the nerve. In handy tablet form—pleasant to take. Suited for all temperaments. Sold by all dealers.

#### FOUND DEAD IN BED.

On Sunday last, Mr. Ben. F. Rogers was found dead in bed at the home of his sister-in-law, Mrs. Susie Rogers, near Farmdale, supposed to be caused from heart failure.

Mr. Rogers was a brave and gallant soldier in the Confederate Army, and carried a bullet in his jaw, until his death, received in battle.

He was the son of the late Mr. Thos. P. Rogers, Sr., and was raised in this county.

He served for several years as a United States storekeeper in the revenue service, being appointed by Col. Thos. H. Shelby.

Recently he had been employed as bookkeeper for the Kentucky Distilleries and Warehouse Co., at the Blakemore Distillery, near Farmdale.

He leaves one brother, Mr. Newton Rogers (out of a large family of brothers and sisters), to mourn his death.

The funeral services were conducted at his home on Monday afternoon at 2 o'clock, and the remains were laid away in our cemetery.

#### RELIEF IS POSSIBLE.

It is possible to obtain relief from chronic indigestion and dyspepsia by the use of Kodol for Dyspepsia. Some of the most hopeless cases of long standing have yielded to it. It enables you to digest the food you eat and exercises a corrective influence, building up the efficiency of the digestive organs. The stomach is the boiler wherein the steam is made that keeps up your vitality, health and strength. Kodol digests what you eat. Makes the stomach sweet—puts the boiler in condition to do the work nature demands of it—gives you relief from digestive disorders, and puts you in shape to do your best. Sold by J. W. Gayle.

#### DISTILLERIES SHUTTING DOWN.

The Kentucky River Distillery, No. 2, has shut down for the season.

The Buffalo Spring Distillery, of Haynes & Trundle, No. 105, at Stamping Ground, made the last mash for the season on Saturday, and has run out.

Dr. Weaver's Syrup and Cermae. Successful treatment for blood and skin diseases.

#### LETTER FROM UTAH.

Green River, Utah, May 5, 1906. Editor Roundabout:

Nearly three months' stay here has enabled me to witness an unusual development of a new town springing up, mushroom like, in the far West.

The traveler passing this place would very naturally ask, "What is there in all this arid waste to build up any sort of a town?" But he knows not whereof he speaks. The one answer is the unequalled soil adaptation and climatic conditions favorable to the successful production of the finest fruits that can be grown in the world, excepting only tropical fruits. This, coupled with the fact that the climate, at all seasons, is almost a panacea, especially for all pulmonary troubles, make it doubly attractive as a place of habitation.

It would be hard indeed for the average Easterner to believe or realize that more hard cash can be made in such superb fruit belts, on ten acres of land, than the best farmer east of the Mississippi river can make off of a quarter section of land—160 acres. But this is literally true, as has been demonstrated time and time again. It seems incredible, and it will, perhaps, be impossible to convince except by personal experience and observation.

It takes men experienced in scientific fruit growing; men of snap, judgment and industry, though, to realize such extraordinary returns, even with the weather conditions favorable to an annual production of fruits.

Under the irrigating system there is never such a thing as a drouth, and very rarely such a thing as a failure in fruit crops, especially apples. In fact no such thing as failure in that crop. Cyclones, blizzards and electric storms are unknown in this region, and as for earthquakes, the only one which ever occurred here was when the great rent in the earth's crust was formed along the course of the Grand Canyon of the Colorado and let flow, with a mighty rush, the waters of a great inland sea, the top surface of which was not less than one mile above the level of the Pacific Ocean. On this there can be no manner of doubt. The

various stages of water level can be easily seen, near the top of the mountains, which are in the form of a vast amphitheatre surrounding this valley. Besides this, additional and unmistakable evidence is found, in great abundance, on top of foot hills in the shape of round, wave-washed pebbles of various kinds, colors and sizes, all of an antiquity that is enigmatical to the paleontologist. But this is digressing somewhat. I wish to convey the idea that all this vast region of rich soil is nothing more than a series of deposits of thousands upon thousands of years' forming the bed of that ancient sea.

The valley is at an elevation of 4,080 feet above sea level, which forms a happy mean between two extremes, viz: sea level and average height of Rocky Mountains. In my first letter, in speaking of the marvelous bridge to be erected over Royal Gorge, at a height of over 2,400 feet, I neglected to name the length of the span, 500 feet. Trolley cars are to cross this bridge running up from Cannon City.

Now if any of your readers can imagine that the distance from the crest of Fort Hill to Cemetery Hill was 500 feet, and they were down in the center looking straight up for nearly half a mile, they might possibly have some conception of the majestic spectacle this new wonder-bridge will present to the world when finished. But at the same time they must also imagine solid, perpendicular walls of granite rising to the height of 2,000 feet with indescribable roughness characterizing all its environments.

I devour the contents of the Roundabout with a relish peculiar to the homesick man thousands of miles away. Some articles have struck me with force as being of the unique order.

One in particular, the author of which seemed to take a whack at all creation and the great pre-existing omnipotence thrown in. Having no interpreter, it was an uphill business, even with Webster's latest unabridged called in as aid, to fathom the mystifying depth. Neither the microscopic microbes, nor the germ of the tiny mustard seed, nor the far off Satellites of Uranus, painted with a silvery beauty, unapproachable in their transcendent glory; nor, in fact, any scope of the solar system, nor the reflected light of the chief luminaries of the literary world, of the old and the new, of antiquity, of the middle ages and present, had the remotest chance to escape the sweeping pen of this modern literary book worm of prodigal proportions. The mystical gods are even brought into the inscrutable scope. Space, even microscopic space, magnified to a minimum, was brought to light. This "Last Night's Thoughts" production is clearly a theme of the composite order.

Providence is not arraigned—"God moves in a mysterious way, his wonders to perform. He plants His footsteps on the sea and rides upon the storm." This author could not imagine God planting His footsteps on the tidal wave and riding into Galveston and drowning the people like so many rats, nor sweeping down the slopes of Vesuvius, and with the other volcanic fire of that which overwhelmed St. Pierre, wiping them out of existence with a fiery cataclysm. These are not the kind of wonders He performs. These are the effects of the globe preserving its equilibrium.

If I were to say my conception of Divinity was a being whose center was elsewhere, and whose circumference was nowhere, I would, no doubt, be pronounced somewhat of a pantheist. If I were to say I believed in the doctrine of re-incarnation of the soul, of the doctrine of universal brotherhood and the total abandonment of everything selfish, I would, no doubt, at once be pronounced a Theosophist. Why not?

[Continued on page 8.]

## Commencement

Day

Is Drawing Near!

The gladdest day of the whole year to the faithful young students, and the proudest day in the life of the daughter who graduates.
